

● FOR PHYSICIANS, NURSES & MEDICAL AESTHETIC PRACTITIONERS

# ASAHRS Hair Transplant Fellowship Program™

A Structured, Academically Grounded Fellowship for Modern Hair Restoration

Designed for physicians and nurses seeking competency in modern hair restoration — including FUE harvesting, implantation, hairline design, non-surgical bio-restoration, and DNA-based personalization.

✓ Manual, Motorized, Automated & Robotic FUE

✓ Non-Surgical Bio-Restoration

✓ DNA-Based Treatment Personalization

✓ AI-Assisted Consultation Tools

✓ Complete Business Frameworks

✓ Advanced Marketing Protocols

# Comprehensive Training for Medical Professionals

Manual, Motorized,  
Automated & Robotic FUE

Non-Surgical Bio-  
Restoration

DNA-Based Treatment  
Personalization

AI-Assisted Consultation  
Tools

Complete Business  
Frameworks

Advanced Marketing  
Protocols

# What You Will Learn — Part 1

01

## Perform FUE Confidently

- 📍 Donor assessment + safe extraction zones
- 🔄 Proper punch selection & depth control
- 💓 Minimizing transection & improving graft survival
- ✂️ Recipient site creation & basic implantation

02

## Design Natural Hairlines

- 📏 Face-to-hairline ratios & anthropometry
- 👥 Age-, gender- & ethnicity-appropriate patterns
- ≡ Density planning & transition zones
- 🧠 AI-based hairline visualization tools

03

## Create Integrated Treatment Plans

- 🔗 Combining surgical & non-surgical modalities
- 💊 Medical therapy + nutraceutical planning
- 💡 LLLT/LED & device-based add-ons
- ✅ Simple, structured follow-up protocols

## What You Will Learn — Part 2

04

### Offer Non-Surgical Bio-Restoration

- ✂ Ultrasonic, pneumatic & plasma workflows
- ≡ Density-building protocols for early cases
- 🛡 Maintenance & stabilization pathways
- 👥 Staff delegation strategies

05

### Market Ethically & Effectively

- 🏢 Professional positioning & differentiation
- 👤 Patient journey design & expectations
- 📷 Before/after & documentation standards
- 🔗 Retention, referrals & basic funnels

06

### Use Genetics for Personalization

- 📋 Simplified interpretation of key SNPs
- 🔗 Integrating genetics into treatment planning
- 💬 Explaining genetic findings to patients
- 👤 Building highly individualized programs

# Why Choose ASAHRS Fellowship? (Part 1)

## Intensive Hands-On Training

-  Live FUE extraction & implantation sessions
-  Hairline design & graft-planning exercises

-  Device-based bio-restoration training
-  Personalized clinical guidance

## Comprehensive Clinical Foundation

-  Manual, motorized, automated & robotic FUE
-  Hairline architecture & long-term donor planning

-  Recipient site creation & graft survival fundamentals
-  Postoperative care & stabilization protocols

## Integrated Non-Surgical Bio-Restoration

-  Ultrasonic & pneumatic transdermal delivery
-  Cold plasma scalp bio-stimulation

-  Peptide, growth serum & infusion protocols
-  Evidence-based maintenance pathways

# Advanced Training & Practice Growth (Part 2)

## Genetics-Based Personalization

 Interpret key hair-loss genetic markers

 Explain genetics effectively to patients

 Integrate DNA findings into surgical/medical planning

 Differentiate your practice with precision medicine

## Structured, Competency-Driven Curriculum

 Clear, measurable skill objectives

 Clinical reasoning linked to hands-on execution

 Standardized protocols & checklists

 Focus on safety, reproducibility & mastery

## Practice Integration & Growth

 Frameworks for offering surgical + non-surgical services

 Physician-appropriate marketing systems

 Pricing, packaging & treatment structuring

 Roadmap for sustainable practice expansion

# Upcoming Training Locations — Dates & Pricing

**Beverly Hills,  
CA**

Jan 23–26,  
2026

8920 Wilshire Blvd Suite 604  
Beverly Hills, CA 90211

\$ Tuition: \$3,450

Register Now

**Miami,  
FL**

Feb 20–23,  
2025

8200 W 33rd Ave #8  
Hialeah, FL 33018

\$ Tuition: \$3,450

Register Now

**Las Vegas,  
NV**

Apr 03–06,  
2026

3195 St Rose Pkwy  
Henderson, NV 89052

\$ Tuition: \$3,450

Register Now

# Foundations & FUE Theory

ASAHRS Advanced Hair Restoration Fellowship™ — 4-Day Premium Schedule

## Introduction to Hair Transplantation

Evolution of the field, global standards, and modern best practices framing safe, ethical care.

## Understanding Hair Loss

Classification, diagnostic frameworks, and comprehensive patient evaluation for accurate planning.

## Hair Restoration Fundamentals

Medical, surgical, non-surgical, and cosmetic approaches; scalp anatomy, physiology, and pathology.

## Complete FUE Theory

Indications, advantages, graft quality parameters, and patient selection criteria for optimal outcomes.

## Extraction Techniques

Manual, motorized, semi-automated, and fully automated harvesting methods with safety emphasis.

## Implantation Techniques

DHI, Choi, implanter-based placement, and FUEsion automated implantation systems.

# Hair Transplantation Deep-Dive + AI Ecosystem Training

## HAIR TRANSPLANTATION DEEP-DIVE

### Advanced FUE Concepts

Technique refinement, graft survival factors, complication prevention.

### Extraction Technique Refinement

Punch choice, angle adaptation, depth control, transection minimization.

### Implantation Technique Refinement

Density planning, angle matching, curl direction, natural design.

## MASTERING THE ARTIFICIAL INTELLIGENCE ECOSYSTEM

### Hair Studio

AI graft calculator: automated counting, density mapping, design simulation.

### Result Simulation

High-accuracy outcome visualization for patient understanding.

### Pathology Diagnosis

AI differential for AGA, shock loss, scarring alopecias, and more.

### Graft Analysis

Microscopic assessment with AI grafts counting, localization and differentiation.

### Aesthetic Procedures

Digital simulation for beard, eyebrow, and female hairline design.

### AI Trichoscopy

High-resolution, AI-assisted trichoscopic analysis for hair loss and pathology diagnosis.

# Beard & Eyebrow, Non-Surgical, Genetics, Anesthesia

## Beard Transplantation

Indications, graft selection, hair angulation, density design, and donor management for natural beard growth patterns.

## Eyebrow Transplantation

Natural flow patterns, direction matching, implantation technique, and aesthetic shaping for feminine/masculine brows.

## Non-Surgical Hair Restoration

Evidence-based protocols: device-assisted therapies, photo-biomodulation, bioactive infusion, and scalp rejuvenation workflows.

## Genetic / DNA-Based Personalization

Use genetic markers to individualize plans, optimize response, and integrate predispositions into surgical/medical decisions.

## Local Anesthesia in Hair Transplantation

Ring vs. field blocks, tumescent techniques, infiltration patterns, safety protocols, and pain-controlled procedure execution.

# Day 2 — Afternoon: Real Case Studies + Marketing Mastery

## Marketing Your Hair Restoration Practice

- 🚩 Branding, positioning, and niche creation
- 🔍 SEO & SEM
- 📈 Lead funnels, nurturing & high-conversion journeys
- 📊 Analytics & performance dashboards
- 📅 30–60–90 day practice launch blueprint
- 📈 Instagram, TikTok & Google growth strategies
- 🔗 Social Media Optimization & multi-platform content
- 🏢 AI-driven marketing & workflow automation
- 💬 Consultation scripts, pricing & packaging

## Real-Life Case Studies

- 👤 Male & female pattern hair loss
- 👤+ Beard & eyebrow restoration
- 👤 Transgender hairline design
- 🔧 Corrective & repair cases

## Hands-On Extraction Practice

Practical training on motorized, semi-automated, and automated extraction systems.

- ⚙️ Device setup & ergonomics
- 👤 Angle, depth & punch control drills
- 🛡️ Safety & consistency techniques

# Days 3 & 4 — Extraction, Implantation, Robotics + Certification

## Morning Sessions

Motorized FUE Hands-On — supervised extraction with technique correction

AI, AR & Robotic FUE — observation + assisted work with precision mapping

## Afternoon Sessions

Hands-on Extraction Practice — punch alignment, depth, angle, donor uniformity

Graft Handling Module — microscopic sorting, hydration, survival optimization

Implantation Hands-On — manual, DHI/Choi & automated implanter systems

## Day 4 End — Finalization & Certification

Fellowship Review & Q&A — recap, clarification of techniques, clinical guidance

Certification Ceremony — ASAHRS Advanced Hair Restoration Fellowship

# Ready to Advance Your Hair Restoration Practice?

4-day hands-on fellowship for physicians, nurses, and medical aesthetic practitioners. Limited seats per cohort.

Physician-focused training: Manual, motorized, automated & robotic FUE; hairline design; non-surgical bio-restoration; genetics-based personalization.

Our other highly sought after Fellowship Program

# ASAHRS Non-Invasive Hair & Skin Bio-Restoration Fellowship™

A Next-Generation Aesthetic Fellowship for Medical Professionals

A science-driven, non-surgical Hair & Skin Bio-Restoration program integrating cutting-edge technologies, DNA-based personalization, and turnkey business frameworks. Launch a high-demand, cash-based service line in 30–90 days.

✓ Ultrasonic & Pneumatic Delivery Systems

✓ Cold Plasma Bio-Rejuvenation Technology

✓ LED Photobiomodulation Therapy

✓ DNA-Based Treatment Personalization

✓ Turnkey Business Implementation

✓ Complete SOPs & Clinical Protocols
